GLOBAL LEADER IN CYCLING FOOTWEAR FIT

LAKE CX403

Kangaroo Leather Lined
Supple and durable leather lining that naturally breathable and anti-microbial

Moldable Carbon Heel
Integrated Heat mold the carbon heel for a more customized fit

Kangaroo Leather
Lightweight, breathable and supple upper

Li2 Closure
Featuring maximum impact protection, resistance to accidental opening and dirt contamination, Li2 offers increased Lace capacity in a lower profile design.

Replaceable Heel Pad
Long lasting TPU heel pad

Carbitex CX6™ Carbon Fiber Stabilizer
Support panels help keep the foot stabilized, control stretch and allow for increased power transfer

Dual 100K Force Carbon Sole
Lake's patent double layer carbon sole for extreme stiffness, ultra-lightweight and industry leading comfort

Integrated heel

Moldable support

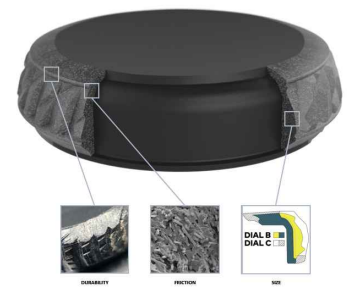

Power platform

Stability platform

By using our thermal formable technology we can close the heel counter to create a custom fit in conjunction to the adjustability provided by the BOA® lacing system.

Rubber Toe
Protective toe guard for increased durability

White/Black

CX403 is the pinnacle for cycling shoes. Every aspect of this shoe is purposeful with a singular goal of being the highest performance and most comfortable cycling shoe that delivers optimal power transfer.

Last: CX Race

Upper: Klite Kangaroo leather & mesh upper with Perforated Kangaroo leather lining with new Carbon fiber support panels which help to maintain a secure fit. Supple and form fitting Kangaroo leather is naturally lightweight and breathable. This creates an upper that forms to your foot naturally, which in turn allows your foot to maintain comfort throughout the ride.

Outsole: Custom Fit Carbon Fiber sole. Men's regular width available in a 3-hole or Speedplay specific cleat pattern for use without adapters. Replaceable heel strike pad. The Thermoform rear 1/4 alters the dynamics of pedaling creating one of the most stable platforms for high output cycling while also maintaining superior comfort. Lake's Custom Fit Carbon platform provides heel lock and total foot stability like nothing else. Unique to Lake is our patent double sole system. The inner sole is a semi flexible carbon fiber platform that allows the foot to have some flexibility at the ball of the foot where the foot tends to swell and hot spots or numbness would occur. The inner sole is suspended over the outer rigid carbon sole. This system enables us to use an extremely stiff carbon outsole without sacrificing riding comfort.

Closure: BOA® Side mounted Li2 Push/Pull lacing system with soft form fitting lace guides.

Colors: White/Black, Black/Silver, Chameleon Blue/Black, Chameleon Green/Black or #LakeCustom Colors

Sizes: Men's regular & wide (EE): 39-48; 50, 39.5-46.5
Women's 36-43, 37.5-42.5

LAKE CX332

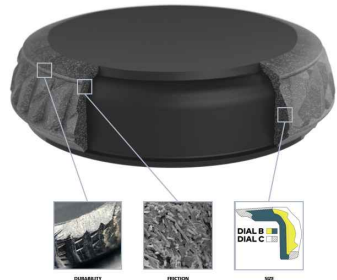

Outlast Lined
Temperature management fabric in the heel and under the tongue

Moldable Carbon Heel
Heat mold the carbon heel for a more customized fit

Kangaroo Leather
Lightweight, breathable and supple upper

Li2 Closure
Featuring maximum impact protection, resistance to accidental opening and dirt contamination, Li2 offers increased Lace capacity in a lower profile design.

Chameleon Blue/Black

Replaceable Heel Pad
Long lasting TPU heel pad

Dual 90K Force Carbon Sole
Lake's patent double layer carbon composite sole for extreme stiffness, ultra-lightweight and industry leading comfort

The CX332 is a Classic Design with Modern elements such as Dual Boa® Closure & a lightweight carbon sole system. The CX332 also draws from the same Thermoform technology as found in the CX403.

Last: CX Race

Upper: Klite Kangaroo leather. Outlast temperature regulating heel & tongue liner. Internal Thermoform Carbon Fiber heel counter. The Internal heel counter is heat moldable carbon that gives the option to better customize the heel hold. A secure heel hold will stabilize the foot and eliminate heel slip. A stable foot allows for more power transfer and less fatigue. Form fitting Natural leather upper in combination with the dual BOA® closure system insures that your foot will be secure without needing to over tighten the shoe.

Outsole: Lake Race 100% Carbon Fiber Sole. Available in 3 hole cleat pattern or Speedplay specific. The CX332 utilizes Lake's patent double sole system. The inner sole is a semi flexible fiberglass platform that allows the foot to have some flexibility at the ball of the foot where the foot tends to swell and typically hot spots or numbness would occur. The inner sole is suspended over the outer rigid carbon sole. This system enables us to use an extremely stiff carbon outsole without sacrificing riding comfort.

Closure: Dual Side mounted BOA® Li2 Push/Pull lacing system.

LAKE CX241

The CX241 was designed for those riders with foot issues such as bunions, deformation or extremely narrow feet who need a shoe that will not beat their feet up, giving the rider the endurance they need to stay on the bike. The upper has separated panels that allow for fine tuning the pressure and fit which also allows the upper to conform around sensitive and painful spots on the foot without the same level of constraint that is felt in traditional shoe uppers.

Moldable Carbon Heel
Heat mold the carbon heel for a more customized fit

Fullgrain Ecco Leather
Lightweight, water resistant and supple natural leather provides long lasting comfort.

Dual IP1 Closure
features incremental adjustment when the dial is under tension, and a pull up for quick release interface. IP1 also offers a mirrored system for left and right dial rotation in the same or opposite direction, depending on mounting location.

Replaceable Heel Pad
Long lasting TPU heel pad

Pressure Relief Zones
Nufoam panels allow feet to remain comfortable and pain free by removing pressure zones in places where feet may have bunions or deformations

80K Force Carbon Sole
Great power transfer and comfort in a lightweight and supportive sole platform

Split Panel Upper
Ultimate adjustability for hard to fit feet that are sensitive to pressure and constraint found in traditional shoes

White/Black

The CX241 is a culmination of all of our experience, advanced materials and shoe making techniques to make a shoe that offers the best fitting solution for any foot type. With a heat moldable heel counter and an uniquely designer upper that has enough adjustability to accommodate feet with any instep height or foot volume without sacrificing comfort.

Last: CX Competition

Upper: Fullgrain Water Resistant Ecco Premium leather and Nufoam lining. The upper is segmented into 4 independent zones for the most flexible fit to accommodate narrow or wide feet as well as high instep and low instep feet. The moldable heel counter doubles the heel hold for a secure fit.

Outsole: Lake Competition 100% Carbon Fiber Sole. Available in 3 hole cleat pattern. A 100% carbon fiber sole that creates a comfortable, lightweight and classy package.

Closure: Dual Side mounted Push/Pull IP1 BOA® lacing system with releasable lace guides. The dual BOA® closure system offers even more adjustability than a single BOA®.

NEW Color: White/Black, Black/Silver or Reflective Silver/Grey Microfiber

Sizes: Standard 36-48; 50, 39.5-46.5; Wide (EE) 37-48; 50, 39.5-46.5

White/Black

Taking comfort and fit to the next level is the CX201. Featuring an all new LAST with a wider toe box and a unique construction that offers a light weight and extremely breathable shoe with a generous forefoot platform that accommodates a multitude of foot shapes.

Last: CX Comfort Plus

Upper: Clarino Microfiber upper with NuFOAM™ breathable, wicking shell with Trek-Dry antimicrobial liner. NuFoam's unique design works in a way that keeps your foot feeling cool and dry. The innermost layer of the NuFoam package is Trek-Dry antimicrobial & wicking fabric made from carbonized bamboo. The Trek-dry draws moisture away from the foot towards the surface of the shoe. The middle layer of the Nufoam package is a 2mm closed cell perforated foam that works as a spacer to allow air to flow into the shoe, thus creating evaporation. This process works as a cooling system where the evaporating moisture cools the foot down while also keeping it dry.

Outsole: Lake Comfort Plus Carbon Composite Sole. Available in 3 hole cleat pattern.

Closure: BOA® Side mounted Li2 Push/Pull lacing system.

Color: Black/White or White/Black

Sizes: Standard 36-48; 50, 39.5-46.5

LAKE CX177

LAKE MX332 SUPER CROSS

The MX332 SuperCross was developed based on feedback from top level pro Cyclocross racers. The demand was for a lightweight, stiff, SPD compatible Cyclocross race shoe with a minimal and modular sole for athletes that rarely clip out of the pedals. The MX332 Supercross is a race shoe in the strictest sense.

Last: MX Race

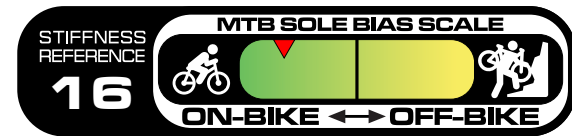

Upper: Clarino Microfiber upper or Custom Color Kangaroo Leather. Outlast temperature regulating heel & tongue liner. Internal Thermoform Carbon Fiber heel counter. The MX332 SuperCross draws from the same Thermoform technology as found in the CX403. The Internal heel counter is heat moldable carbon that gives the option to better customize the heel hold. A secure heel hold will stabilize the foot and eliminate heel slip. Stable foot allows for more power transfer and less fatigue. Form fitting Natural leather uppers. Now available as a custom option in Fullgrain Cow Leather or Supple/Durable Tektile Microfiber.

Outsole: Lake Race 100% Carbon Fiber Sole with rubber cleat pocket, 2 row replaceable toe spikes. The MX332 utilizes Lake's patent double sole system. The inner sole is a semi flexible fiberglass platform that allows the foot to have some flexibility at the ball of the foot where the foot tends to swell and typically hot spots would occur. The inner sole is suspended over the outer rigid carbon sole. This system enables us to use an extremely stiff carbon outsole without sacrificing riding comfort. We have combined this with Lake's unique modular tread system, which allows the sole tread to be customized based on ground conditions.

Closure: Dual Side mounted BOA® Li2 Push/Pull lacing system. The dual BOA® closure system insures that your foot will be secure without needing to over tighten the shoe.

Color: Chameleon Blue/White Microfiber or #LakeCustom Color

Sizes: Men's regular & wide (EE) 39-48; 50, 39.5-46.5
EXTRA wide (EEE) 39-48; 50, 39.5-46.5
Women's 36-43, 37.5-42.5

LAKE MX332 LITE

The MX332 Lite is a slimmed down version of the standard MX332 for reduced weight that is well suited for those riders who need the extra weight savings.

Outlast Lined

Temperature management fabric in the heel and under the tongue

Ultra-Lightweight Microfiber

Durable yet supple finish

Moldable Carbon Heel

Heat mold the carbon heel for a more customized fit

Li2 Closure

Featuring maximum impact protection, resistance to accidental opening and dirt contamination, Li2 offers increased Lace capacity in a lower profile design.

80/20 Rated Sole

Designed for cyclist that spend majority of their time on the pedal needing high performance & lightweight without giving up grip when their foot does hit the ground

No Toe Spikes

Metal hardware for toe spikes have been removed to reduce weight.

Last: MX Race

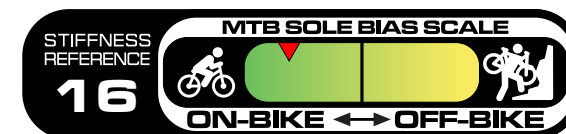

Upper: New Ultra-Lightweight Clarino Microfiber upper for black colorway. Outlast temperature regulating heel & tongue liner. Internal Thermaform Carbon Fiber heel counter. The MX332 draws from the same Thermaform technology as found in the CX403. The Internal heel counter is heat moldable carbon that gives the option to better customize the heel hold. A secure heel hold will stabilize the foot and eliminate heel slip. Stable foot allows for more power transfer and less fatigue. Form fitting Natural leather uppers. LAKE MX168 TRAIL

Clarino MICROFIBER™ TEK TILE™ synthetics BOA®

The backwoods bikepacking shoe that is made to handle the abuse and all day riding. Fast drying microfiber upper, tons of adjustability and a sole that is equally durable as it is comfortable.

MX168 is all about utility, durability, foot protection and an even more sure footed grip with our ultra bomb proof enduro rubber sole. Designed for all around mountain biking, commuting, enduro touring, adventure racing or any situation where “heavy use on your feet all day” support is needed. Our Enduro rubber sole is not only SPD compatible but is able to grip cage pedals, be hiked in comfort for hours and offers the most traction and grip off the bike of any mountain bike sole on the market.

Microfiber Upper
Extremely durable & lightweight

IP1 Closure
features incremental adjustment when the dial is under tension, and a pull up for quick release interface. IP1 also offers a mirrored system for left and right dial rotation in the same or opposite direction, depending on mounting location.

Dual Hook-n-Loop Straps
Fine tune the fit with fast adjusting straps

Abrasion Panels
Protective abrasion resistant toe & side guards

50/50 Rated Sole
Equally as comfortable & durable on or off the bike.

Last: MX Competition

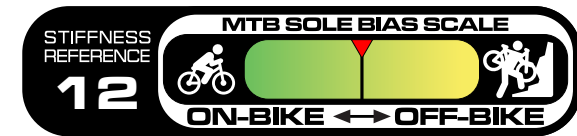

Upper: Clarino Microfiber and abrasion resistant Tektile panels. The MX168 features form fitting, durable and breathable microfiber and mesh upper with a comfortable and secure BOA® closure.

Outsole: Ultra Bomb proof Enduro Sole with Ice Lock anti-slip lug inserts. What really shines on the MX168 is the sole system. Not only does the MX168 feature Lake's Legendary Fiberglass injected Nylon sole, but also one of the most technically advanced rubber soles. The rubber sole features ICE LOCK tread inserts, which are vertically injected micro glass fibers that grip virtually all surfaces. This gives you an all conditions cycling shoe that is sure footed and stable in any situation.

Closure: Easy Replaceable Tongue Mounted IP1 BOA® lacing system with dual hook loop straps. The unique Tongue mounted BOA® closure is completely adjustable to find the perfect location on the foot and it is extremely easy to replace for quick maintenance.

Color: Black/Silver

Sizes: Standard 36-48; 50 Whole sizes only. Wide (EE) 39-48; 50 Whole sizes only.

LAKE MX201 FLAT

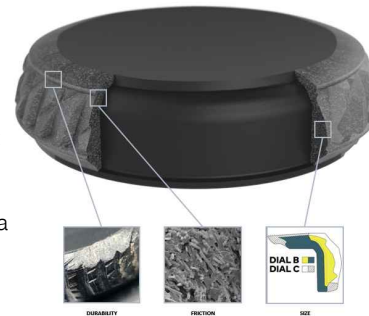

Clarino
MICROFIBER™

BOA®

Microfiber Upper
Extremely durable, supple & lightweight

Li2 Closure
Featuring maximum impact protection, resistance to accidental opening and dirt contamination, Li2 offers increased Lace capacity in a lower profile design.

Comfort Plus Last
All new Last shape with a wider toe box to fit a wider variety of foot shapes

NuFoam Mesh
Breathable moisture management with built-in stretch for a secure platform for when needing to pedal on top of the shoe during transition

30/70 Rated Sole
Flat Pedal biased sole that excels with great pedal grip and sole stiffness while being comfortable for everyday walking and casual wear

Helcor Leather
Protective abrasion resistant toe & Heel guards

The MX201 Flat strikes the perfect balance for flat pedal riding and all day walking comfort. The semi-flexible sole offers perfect comfort for walking and the stiffness needed for all day cycling. Built on our Comfort Plus LAST with a wider toe box the MX201 Flat has a unique construction that offers a light weight and extremely breathable shoe with a generous forefoot platform that accommodates a multitude of foot shapes.

WORLD CLASS LEATHER

BOA®

Outlast™

3M
Thinsulate™
INSULATION

The Ultimate Winter Cycling Boot maker has just raised the bar. With double the insulation and built on a Cycling Specific Winter Last, our all New MXZ400 is the new standard for extreme cold weather cycling footwear.

Seam Taped Outlast Membrane Bootie
Increased water resistance

Dual Click-Fit Quick Release
Easy Entry & Exits

Leather Over-Flap
Protective layer with reflective panels

Dual IP1 Closure
features incremental adjustment when the dial is under tension, and a pull up for quick release interface. IP1 also offers a mirrored system for left and right dial rotation in the same or opposite direction, depending on mounting location.

Gator D-Ring
Secure boot gator

Pittard's WR100 Leather
Highly water resistant while maintaining breath-ability

Helcor Leather
Protective abrasion resistant toe guard

50/50 Rated Sole
Equally as comfortable & durable on or off the bike.

Last: Winter Extreme

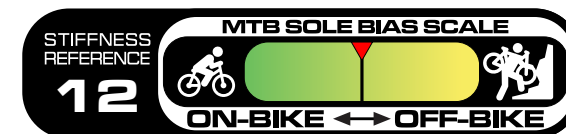

Upper: Pittards WR100 & Helcor Abrasion resistant leather, Outlast temperature regulating liner, waterproof membrane, 400gram 3M Thinsulate lining, Thermosol composite insulation insole. The upper is Water Resistant Pittard's Full grain leather & Helcor abrasion resistant and waterproof leather. There is a reason leather is still used in hardcore arctic footwear and the natural breathable and insulating properties are one of the reasons why Lake winter boots works so well. 100% lined with Outlast temperature regulating fabric, this liner reacts to your body to maintain a comfortable to the touch temperature. In order to keep the warm air in and the cold air from entering the bottom, we use a composite 6 layer footbed that creates a temperature isolating barrier that keeps the heat in and the cold out.

Outsole: Ultra Bomb proof Enduro Sole with Ice Lock anti-slip lug inserts. The rubber sole features ICE LOCK tread inserts, which are vertically injected micro glass fibers that grip virtually all surfaces. This gives you an all conditions cycling shoe that is sure footed and stable in any situation.

Closure: Easy Replaceable Tongue Mounted IP1 BOA® lacing system and Side mounted Push/Pull IP1 BOA® lacing system and click-fit quick release. In conjunction with the dual BOA® closure system we are able to have a shoe that does not cut off circulation while offering a secure foot and heel hold.

Color: Black/Silver

Sizes: 36 - 48; 50 Whole sizes only.

LAKE MXZ304

Pittard's
WORLD CLASS LEATHER

BOA

3M
Thinsulate
INSULATION

In 1997 Lake invented the first true winter specific cycling shoe with the MXZ300. The unique boot shape allows for us to trap warm air, which is the best insulator for any type of footwear. The MXZ304 continues to be the best of the best as the top winter specific cycling shoe of choice.

Lake Winter Last has a much taller toe box than our traditional lasts. The Winter last allows the foot to maintain proper circulation even when thicker socks are worn. Our winter last is the standard for winter cycling footwear & also available in 2 widths.

Pittard's WR100 Water Resistant Leather upper with Helcor Abrasion & Water Resistant Leather Protection panels makes for a durable, extremely comfortable & long lasting boot. Leather is a tried & true material that has superior cold weather properties do to the molecular fiber structure that keeps the material from becoming stiff or brittle in extreme cold while also having natural breath-ability to allow moisture to escape which in cold weather internal moisture management is critical to maintain warm & dry feet.

New Mid Power M4 Cartridge Tongue mounted BOA dial excels in ice, dirt & other challenging environments & is designed to be easily adjusted with gloves on. The mid-capacity dial combines durability & closure strength to withstand intense force & impact, without sacrificing fit & when combined with Click-Fit quick release, the system makes for an easier entry & exit.

Leather Over Flap with adjustable strap keeps snow & debris from settling into the top of the boot. The additional barrier protects the veins at the top of your feet from the cold & helps to keep circulating blood going to your toes warm.

100% lined with Outlast temperature regulating material helps to maintain a constant foot temperature as well as manage the wicking of moisture away from your feet & helping your feet to stay dry so that sweat is not transferring cold into the core of the boots.

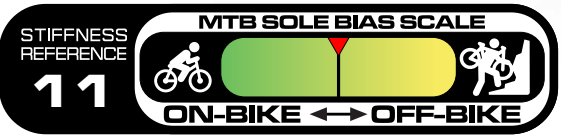

200gram Thinsulate Insulation from toe to heel has the loft to give a comfortable & insulating barrier that does not absorb water & maintains breath-ability so that moisture does not become trapped into the core of the boots.

Heavy duty Mountain V outsole by Vibram. This is all built on Lake's legendary Nylon mid-sole that is extremely comfortable & stiff. For traction control we use durable & grippy Vibram rubber tread for sure footing & stability.

Thermosal Winter Insole is a 5 layer-insulating package of wicking felt, aluminum & non-crushable trapped air bubbles. Trapped air is the best insulator against the cold.

Available color way Black/White.

Sizes: Standard 36-48,50 Whole sizes only. Wide EE 39 - 48; 50 Whole sizes only.

LAKE MXZ200

All of the features of the MXZ304 but in a classically styled hiker. With a semi-flexible nylon sole the MXZ200 is just as comfortable off the bike as it is on. The bottom sole comes sealed giving you the option to use the boot as a dedicated flat pedal all-day hike and bike cycling/hiking shoe.

Continuing on our expertise as all weather condition cycling shoe making, we are reintroducing what used to be a staple in the Lake collection.

Last: Winter

Upper: Ecco vegetable tan leather in Brown or Black version in Pittard's WR100 Water Resistant Leather upper with Helcor Abrasion & Water Resistant Leather toe Protection with a Waterproof membrane liner & 200gram 3M Thinsulate lining in toe box.

Outsole: Heavy duty Mountain V outsole by Vibram. This is all built on Lake's legendary Nylon midsole that is extremely comfortable, stiff enough for cycling and flexible enough to traverse any terrain. For traction control we use durable and grippy Vibram rubber tread for sure footing and stability.

Closure: Laces

Color: Black/Black or Brown/Black

LAKE CUSTOM INSOLE

FITTING

Raven™ Insoles are compatible with most cycling shoes. For best fitting result place your current insole on top of the Raven™ insole and trace the forefoot shape with a marker. Trim away the excess forefoot foam. It is often better to cut less away and check the fitting of the insole inside the shoe, if the insole wrinkles or fits too tight, trim away any excess material from the forefoot.

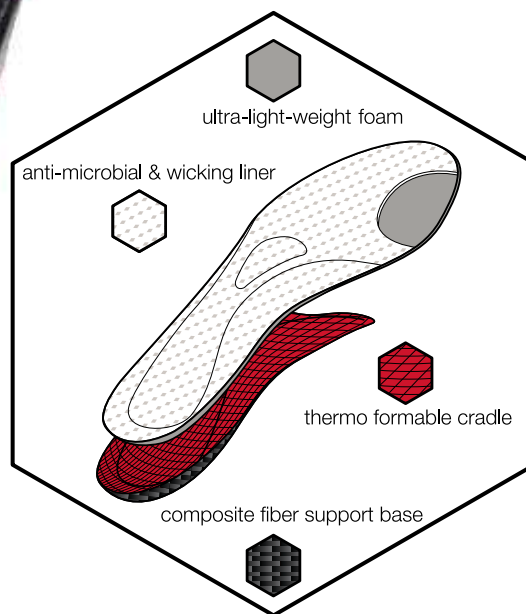

CAPTURE YOUR NATURAL FOOT SHAPE.

Raven™ Insoles composite foot cradle is designed to be reshaped to your foot. The heel cup of the cradle has small slits made around the upper radius to allow the cup to expand for larger sized feet. These slits may or may not be visible after molding.

- Wicking textile face fabric
- Firm EVA foam
- Carbon Fiber Composite Laminate

LAKE MEASURING STICKS

Perfect tool for helping you find the perfect fit!

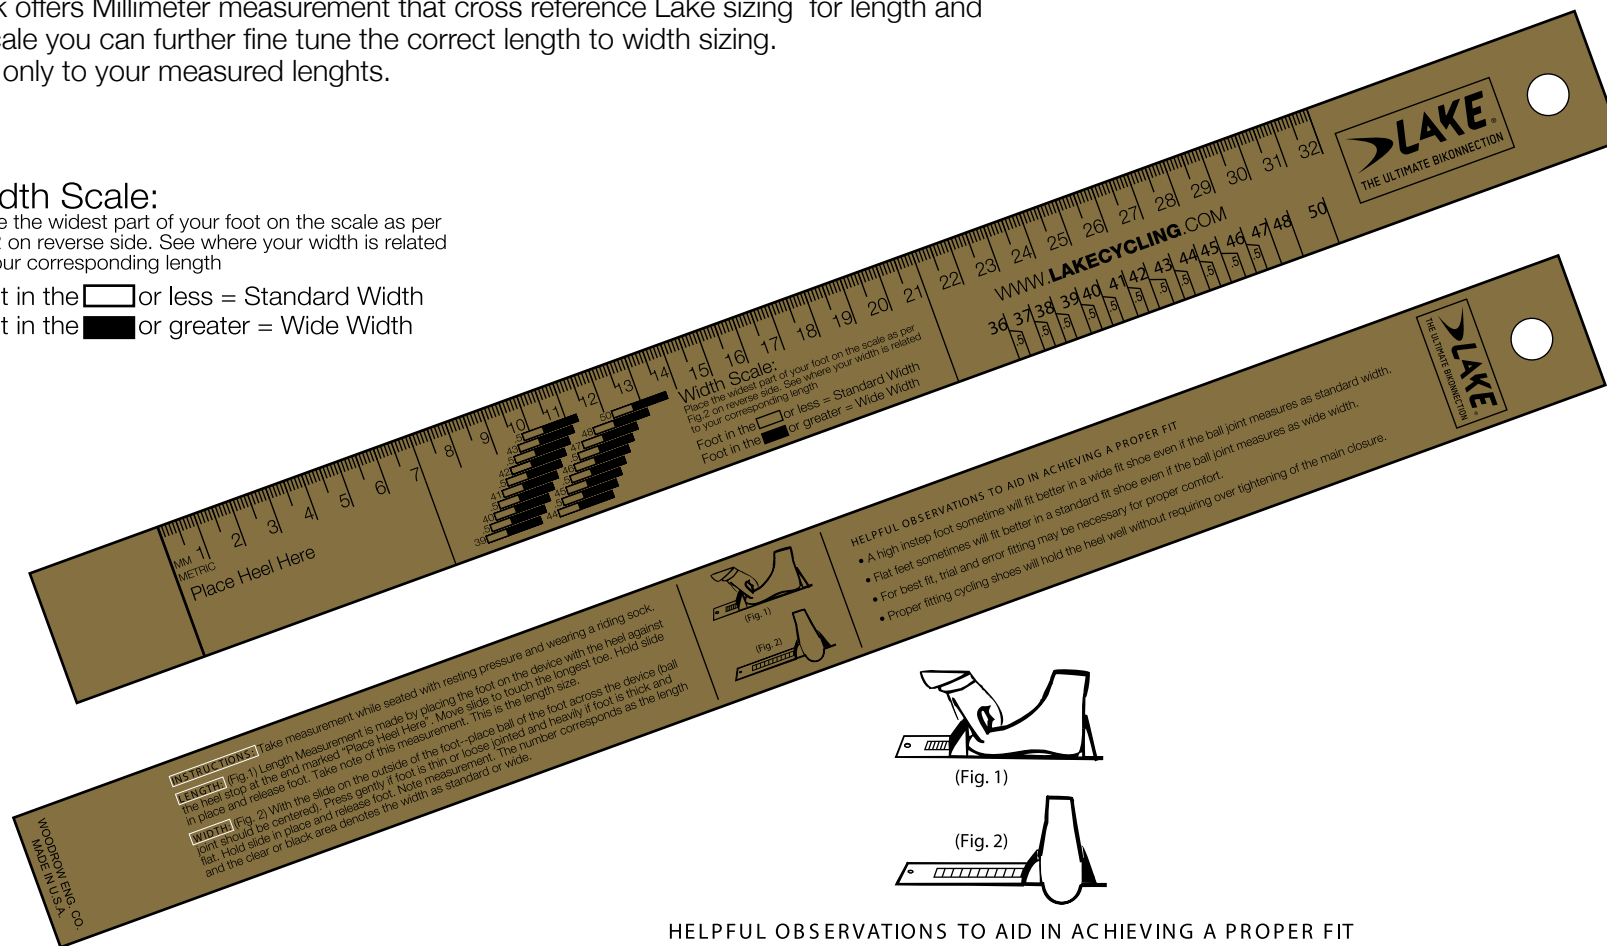

The simple and easy to use Lake Measuring stick helps clear up the guess work to help find the right fitting Lake shoe. The stick offers Millimeter measurement that cross reference Lake sizing for length and width. Using the Width Scale you can further fine tune the correct length to width sizing. Remember to add +5mm only to your measured lengths.

Width Scale:

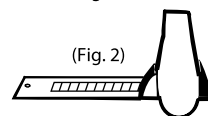

Place the widest part of your foot on the scale as per Fig.2 on reverse side. See where your width is related to your corresponding length

Foot in the or less = Standard Width

Foot in the or greater = Wide Width

(Fig. 1)

(Fig. 2)

- HELPFUL OBSERVATIONS TO AID IN ACHIEVING A PROPER FIT
- A high instep foot sometime will fit better in a wide fit shoe even if the ball joint measures as standard width.
 - Flat feet sometimes will fit better in a standard fit shoe even if the ball joint measures as wide width.
 - For best fit, trial and error fitting may be necessary for proper comfort.
 - Proper fitting cycling shoes will hold the heel well without requiring over tightening of the main closure.

LAKE MATERIALS

K-Lite kangaroo leather, for Lake by Packer Leather, is the lightest, strongest & most durable natural leather. It utilizes multiple surface treatments to better protect & increase the comfort of your feet. Duratek treatment strengthens the leather & protects it from abrasion, & Microblok antimicrobial treatment renders the leather uninhabitable to microbes & germs.

Pittards® WR100 leather is a unique, highly water-resistant & breathable leather, specially engineered to retain softness & suppleness over time. Used in our extreme-condition shoes.

NuFoam™ offers extreme breathability, light weight performance, moisture management and anti-microbial properties all in one package. The perfect technical material for the world's most technical footwear.

Lake Skins Helcor - Extremely durable leather with unique and abrasion resistant finishes. These leathers offer the great fit, feel & durability that Lake has based it's reputation on.

BOA® Closure System is a micro-cable closure system provides a fine-tunable, evenly-distributed closure that eliminates pressure points & hot spots. It is the first mechanical system to meet our exacting standards.

BOA® is a registered trademark of BOA® Technology Inc.

Lake Skins Full Grain - A superior full grain leather that offers a visible & an invisible upgrade in feel, durability, breathability and shape taking ability.

Clarino Microfiber – Engineered in Japan to emulate leather as close as possible with many additional benefits. Up to 30% lighter than leather of the same thickness, fast drying and with great durability and surface finishes.

Carbitex CX6 – Made in the USA from carbon fiber, Carbitex CX6 has the highest tensile strength of any commercially available fiber, it doesn't stretch and is manufactured in an exceptionally flexible form - enabling carbon fiber performance in soft applications.

Vibram® is the world leader in rubber soles for extreme athletic pursuits. Our three exclusive Vibram® soles are the first in the cycling world & set a new standard for function & durability in cycling shoes

Lake Skins ECCO Leather - ECCO leather is a Premium grade leather with classic looks & incredible feel. It ages beautifully while maintaining breathability & naturally adjusting to your foot.

Outlast® SmartFabric Technology uses microencapsulated Phase Change Material (mPCM), which works on a microscopic level to maintain a constant skin temperature. This acts as a buffer against the extreme temperatures generated during high activity. The result is cooler or warmer depending on your body's need, drier, less sweaty, more comfortable feet.

TeKtile – Our collection of Synthetic materials have been selected to meet the high standard that we have set for our shoes. TeKtile material is used precisely where it can offer great strength, visual appeal and a specific function.

Syksól® Premium Footbeds utilize our High Performance Insoles technology to create a superior footbed package. The combination of technical fabrics with ® function specific sole design allows for a footbed that has long lasting comfort as well as improved foot stability that are applicable across all footwear categories.

3M's Thinsulate™ lightweight, thin insulating microfiber-filled fabric traps more air in less space than any other apparel insulator, keeping you warm without bulk.

Thermosol™ – Lake's exclusive footbed liner is designed & produced in Canada to our specifications. Recycled polyethylene fibers, aluminum sheet & a plastic air bubble layer retain heat & insulate your foot from the cold.
